January 1, 2016

To Our Medicare Patients at Rocklin Physical Therapy, Inc.:

In 2016, Medicare will limit coverage for physical therapy to $1960 per year. You may qualify for an exception that will increase the limit to $3700, based on the diagnosis being treated, as well as the medical necessity of the physical therapy. If you exhaust your physical therapy benefit for the year, you will have the choice of continuing your physical therapy treatment with us on a self-pay basis.

We will keep a log of each of your visits so that we can communicate with you and your physical therapist when you are close to reaching your physical therapy cap. Please be aware that the following medical services with other providers will also apply towards your physical therapy cap:

- Physical therapy at another clinic
- Physical therapy at a hospital outpatient department
- Physical therapy at your doctor's office
- Physical therapy with home health (in some instances – ask us!!)
- Speech therapy
- Part B skilled nursing facilities
- Outpatient Rehab Facilities (ORFs)
- Rehab agencies (Comprehensive Outpatient Rehab Facilities (CORFs)

It is important that we know of other services that you have received, or start to receive while attending therapy in our clinic, so that we can keep an accurate log.

Have you had any of the above services this year? _____
Yes or No

If "yes," please indicate what services you have had:

_____

_____

Please sign below to acknowledge that we have informed you of the Medicare therapy cap.
